

SOUMYADEEP DAFADAR

Greater Noida, Uttar Pradesh, India | soumyadeep323@gmail.com | +91-6207699168 | [Soumyadeep081](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate with strong analytical and problem-solving skills and a passion for building practical technology solutions. Experienced in developing innovative projects through academic and personal work that demonstrate creativity, technical proficiency, and attention to detail. Eager to leverage technical expertise to contribute to impactful software development projects and engineering teams.

EDUCATION

G.L. Bajaj Institute of Technology and Management , Greater Noida	2023 – 2027
B.Tech – CSE (Artificial Intelligence) CGPA: 8.67/10	
New Horizon School , Bhagalpur	2023
Senior Secondary (CBSE) – 86.6%	
DAV Public School , Pakur	2021
Secondary (CBSE) – 91.2%	

TECHNICAL SKILLS

Languages	Java, Python, SQL
Frameworks & Tech	Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices, JWT
Databases	MySQL
Tools & Platforms	Git, GitHub, VS Code, Postman, IntelliJ IDEA, MySQL Workbench
Core CS	Data Structures and Algorithms, OOPs, Operating System, DBMS

PROJECTS

NexRide – Distributed Ride Booking Platform | *Java, Spring Boot, MySQL, Eureka, REST APIs, JWT* [GitHub](#)

- Built a microservices-based Uber like ride-booking platform with Auth, Booking, Review, and Location services using Spring Boot.
- Implemented Service Discovery using Netflix Eureka, enabling dynamic service registration and inter-service communication.
- Built secure RESTful APIs with JWT authentication and integrated a responsive frontend for booking, ride tracking, etc.

VENTO – Smart Event Management System | *Java, Spring Boot, MySQL, REST APIs, Spring Security* [GitHub](#)

- Developed event management platform with vendor management, real-time budget tracking, and role-based access control.
- Implemented Spring Security with OAuth2 authentication; designed scalable MySQL schema.
- Exposed modular REST APIs enabling frontend integration and future microservices decomposition.

RAAHI – Tourist Safety & Incident Response System | *Java, Spring Boot, MySQL, Hibernate ORM* [GitHub](#)

- Designed and developed backend architecture for an AI-powered tourist safety platform supporting real-time dashboards and emergency response workflows.
- Built RESTful APIs with JWT and OAuth2 authentication; implemented secure incident reporting and emergency response workflows.

CERTIFICATIONS

- **Java Foundations** – Oracle
- **SQL (Intermediate)** – HackerRank
- **Understanding Agentic AI** – Agent Academy
- **Cybersecurity Fundamentals: Practitioner** – Palo Alto Networks
- **Cloud Foundations** – AWS Academy
- **Fundamentals of Machine Learning** – Microsoft Learn

ACHIEVEMENTS

- Maintained **8.67 CGPA** across 5 semesters while completing multiple software development projects.
- Solved **500+** Data Structures & Algorithms problems across various coding platforms.
- Participated in multiple hackathons: **Adobe India Hackathon**, **RIFT '26 – Hackathon**, and **Guidewire DEVTrails University Hackathon**.
